SUMMARY

Full Stack Software Engineer with nearly 2 years of professional experience building scalable backend services, microservices, web frontends, and cross-platform mobile applications across FinTech and SaaS. Delivered 15+ production REST APIs for 10K+ active users using Java Spring Boot, Node.js, NestJS, and TypeScript, and built user-facing features in React.js and Flutter. Experienced with Docker, Kubernetes, AWS, CI/CD, payment gateway integrations, AI API integrations, SQL optimization, and remote collaboration with international teams.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Node.js, NestJS, TypeScript, Express.js, FastAPI, REST APIs, GraphQL, Microservices

Frontend & Mobile: React.js, Flutter, TypeScript, JavaScript, HTML5, CSS3

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, CI/CD, GitHub Actions

Databases: PostgreSQL, MySQL, MongoDB, Microsoft SQL Server

Languages: Java, TypeScript, JavaScript, Python, C++, C#, SQL

Tools & Practices: Git, GitHub, Jira, Agile/Scrum, System Design, Technical Documentation

EXPERIENCE

Software Developer, BenchMatrix, Remote (Karachi, Pakistan) May 2025 – Present

- Delivered 15+ production Spring Boot REST APIs within a microservices architecture, supporting 10K+ active users across international client workflows.
- Built Flutter mobile features and cross-platform integration modules for enterprise clients, including Al Salam Bank (Bahrain), connecting client-facing screens to backend APIs.
- Automated CI/CD workflows with Docker and maintained Kubernetes deployment manifests to streamline production releases.
- Optimized complex SQL Server stored procedures and queries and automated batch Excel reporting pipelines, reducing manual reporting effort.
- Diagnosed and resolved backend incidents and service performance issues as tier-2 production support.

Backend Development Intern, Doaz, Seoul, South Korea (100% Remote) Nov 2024 – May 2025

- Engineered modular REST APIs with Node.js, NestJS, and TypeScript for a B2B SaaS platform, improving database performance and application scalability.
- Integrated global payment gateways, including PayPal and regional South Korean providers, enabling automated SaaS transactions.
- Containerized backend microservices with Docker and maintained normalized PostgreSQL schemas across development and cloud environments.
- Integrated third-party AI APIs to automate document-processing workflows across PDF, DOC/DOCX, and XML files.

PROJECTS

AI-Powered Fabric Defect Detection Platform (Final Year Project) | React.js, FastAPI, Python, YOLO, MySQL Oct 2024 – Jun 2025

- Built an end-to-end web inspection platform for AI-powered fabric defect detection with a React.js dashboard and FastAPI backend.
- Trained and evaluated YOLO, ResNet, EfficientNet, and Transformer models on 5K+ industrial textile images, achieving 94% classification accuracy.
- Developed low-latency REST inference endpoints delivering real-time predictions and live web interface updates.

- Implemented MySQL storage for image metadata, detection results, and inference tracking.

FeedVisior Emotion Analytics App | Python, Streamlit, AWS, DeepFace, X API Feb 2024 – May 2024

- Developed a video analytics application with Python and DeepFace for real-time facial expression and sentiment detection.
- Implemented asynchronous frame-processing pipelines that split video inputs into parallel chunks to increase processing throughput.
- Deployed the application on AWS (EC2, S3), managing resource allocation under constrained environments.

EDUCATION

NU-FAST, Karachi, Pakistan – BS in Computer Science (GPA: 3.29/4.0) Sep 2021 – Jun 2025

AWARDS & ACHIEVEMENTS

- **7th Position Nationwide** among 400+ national teams, IEEE Xtreme 16.0 Competitive Programming.
- **Runner-Up**, Competitive Programming Challenge at Developer Day.
- **Best Database Project Award** for relational schema design, query optimization, and RBAC implementation.
- **ICPC Regional Competitor**, solving complex algorithmic problems under strict time limits.
